

KANOTIX Introduction

Speaker

Jörg Schirottke (Kano) <master@kanotix.com>

KANOTIX

Overview

- Debian Live based distribution with installer
- Mainly Debian Stable packages
- Latest LibreOffice and Wine-Staging
- KDE/LXDE variants
- Nightly builds (iso.kanotix.com)

Current Team

- Jörg Schirottke (Kano) – Founder
- Holger Paradies (retabell) – Active Developer
- Gunnar Wick (besenmuckel) - Improvements
- Andreas Loibl (acritox) – Installer/Buildsystem
- Of course there were more in the past...

Timeline

- KANOTIX XMAS Preview (23.12.2003)
Introduced as KNOPPIX rebuild based on Debian Unstable (sid) optimized for HD-Install
- KANOTIX 2005-03 64 bit featured on LinuxTag DVD
- Since 2007 based on Debian Stable (Thorhammer[etch])
- Since 2010 build using Debian Live (Excalibur[lenny])
- KANOTIX Hellfire[squeeze] 2011-05 was first ISO with binary GFX overlay (by acritox) for nvidia & fglrx

Timeline continued

- With basic UEFI support (Hellfire[squeeze]/Dragonfire Preview[wheezy]) since 2012, improved in 2013
- KANOTIX Dragonfire Special 2013 with gfxdetect – 3d binary drivers auto-switch even after HD-Install
- Follow-up releases based on Debian Stable: Spitfire[jessie] since 2015, Steelfire[stretch] since 2017
- Current Release: Silverfire[buster] since 2019

Why choose KANOTIX today?

- Simple way to get a preconfigured Debian Stable desktop install with selected current packages (even for 32 bit systems)
- IRC support with bot commands for many common tasks, Forum available as well
- Powerful Live image with some special features

Visit us at our booth

- You can try it by yourself
- Boot via PXE from small embedded device
- Prepare a multiboot KANOTIX USB stick
- Ask us whatever you like

Thank you for your time!

- Linuxdays ISOs including czech language
